To the Public.

The Compiler has much pleasure in submitting to the Public the NEWFOUNDLAND ALMANAC FOR THE YEAR 1869; he indulges the hope that reasonable allowance will be made for such imperfections and inaccuracies as may be found in its pages. No labor or expense has been spared to make it a popular and useful book of reference, and he trusts it will be found quite equal if not superior to those of preceding years.

The NEWFOUNDLAND ALMANAC for 1869 contains, as did also that for 1868, a concise BUSINESS DIRECTORY for the three principal towns of the Colony—St. John's, Harbor Grace, and Carbonear; and as it is intended that the ALMANAC will be extensively circulated out of Newfoundland, the information embodied in THE DIRECTORY cannot fail to be useful to all who have an interest in the Trade and Commercial relations of this Colony.

The Compiler is again indebted to JAMES CAMPBELL, Esq., the worthy and talented Principal of the St. John's Nautical Academy, for the Astronomical Calculations and other Scientific Information contained in the introductory and Calendar pages of the present work. To the Heads of Departments, and others, he is also indebted for their kindness in furnishing the desired information.

The Compiler begs to tender his acknowledgments to the general public for the very favorable manner in which the ALMANAC has been received hitherto; he trusts that the Number for 1869 will be equally favored, and command if possible a much larger share of public support. To the advertising patrons of the ALMANAC the undersigned is indebted for their continued favors, and hopes that the efforts made to give their notices an attractive form will meet with their approval.

The Census of the Labrador was cursorily taken by the late Superintendent of Fisheries (James L. Prendergast, Esquire,) in 1856 and 1857, but it is not sufficiently correct or full to form a part of the foregoing returns. The number of permanent residents, as given by that gentleman, from L'Anse Sablon to Sandwich Bay, both inclusive, including Belle Isle, is 1650, of whom 1331 are Protestants and 319 Catholics.

Eclipses, 1869.

In this year (1869) there will be *Four Eclipses*, two of the SUN and two of the MOON.

First—On January the 27th, there will be a *partial Eclipse of the Moon*, and will be visible in this Island during its continuance, as the Moon will rise on that day about 38m. past 7h. p.m., and consequently the following phenomena can be observed, if the weather be clear, at the following times :—

Mean time of conjunction in R. A.....	10h. 20m. 49s. 6.
First contact with Penumbra.....	7h. 47m. 30s.
First contact with Shadow.....	8h. 58m. 29s.
Middle of Eclipse.....	10h. 7m. 29s.
Last contact with Shadow.....	11h. 16m. 30s.
Last contact with Penumbra.....	12h. 27m. 29s.

[St. John's Mean Time.]

Second—On February 10th and 11th, an *annular Eclipse of the Sun*, not visible in any part of the Northern Hemisphere, higher than the 10th degree of North Latitude, the central line of Eclipse being from Lat. 50deg. 12min. S., Long. 107deg. W., to Lat. 24deg. 48min. S., Long. 50deg. 24min. E.

Third—On July 22d and 23rd there will be an *Eclipse of the Moon*, but the Moon will not be above our Horizon during its continuance, and consequently cannot be seen in Newfoundland.

Fourth—On August the 7th, there will be a *total Eclipse of the Sun*, not visible in Newfoundland, tho' it be visible all around the North Pole, and about the middle of the central line on the Earth. and the middle line of the phenomenon will be about Bherings Straits.

The Planet VENUS will rise before the SUN, and consequently will be a Morning Star till the 10th of May, this year; but from this date to the end of the year, she will be an Evening Star.

MARS will be a Morning Star till February 16th; from this time to the end of the year he will be an Evening Star.

JUPITER will rise after the SUN, and thus will be an evening STAR till April 17th, but too near the Sun to be seen; after this date he will rise before the SUN till Nov. 14th; from this latter date, to the end of the year, he will be an Evening Star.

Planetary Notice.

The Planets of the Solar System are 29 in number. Of them, 11 are *primary*, and 18 *secondary*, or Moons. Of these Moons, our EARTH has one, *Jupiter* four, *Saturn* seven, and *Uranus* six. Of the *primary* planets, two are called *inferior*, viz., *Mercury* and *Venus*, because they are nearer the *Sun* than the *Earth*; the others are called *superior*, because farther from the *Sun* than the *Earth*.

<i>Distance from the Sun.</i>	<i>Magnitude—diameters in miles.</i>	<i>Len. of year.</i>
Mercury, 37 millions of miles	3,140	3 months.
Venus, 68 millions of miles	7,700	7½ do.
Earth, 95 millions of miles	7,912	1 year.
Mars, 142 millions of miles	4,200	2 do.
Jupiter, 485 millions of miles	89,000	12 do.
Saturn, 890 millions of miles	79,000	29 do.
Uranus, 1800 millions of miles	35,000	84 do.

The Eclipses of Jupiter's Satellites (given in the Greenwich Almanac to the nearest tenth of one second of time) afford the easiest means of knowing the Greenwich time, and thence to determine the longitude of whatever place on the globe, the observer may be situated. No calculation is required, but they cannot be observed at sea, the motion of the Ship rendering it impossible to secure that steadiness of the instruments necessary to observe them.

St. John's.

True Latitude of Church Hill	47.34 North.
Longitude (West of Greenwich)	52.42 West.

NOTE.—The Tide Tables (in the Calendar pages) may be rendered applicable to various other places on the coast, by simply adding or subtracting, as the case may be, the difference between the times of High Water on the Full and Change of the Moon at St. John's, and the time of the full tide at any other harbor; for example, to find the time of High Water at any of the principal harbors of Conception Bay, add 45 minutes to the time at which it will be High Water at St. John's; for Placentia Bay, add 2 hours; for St. Peter's, 1h. 50m.; for Ferrolle, on the French Shore, 4 hours, &c.—See table LVII. of *Norie's Epitome*.

MISTS.—A white mist in the evening over a meadow with a river will be drawn up by the sun next morning, and the day will be bright. Five or six fogs successively drawn up, portend rain.—Where the mist which hangs over low lands, draws towards high hills in the morning, and rolls up to the top, it will be fair; but if the mist hangs upon the hills, and drags along the woods, there will be rain.

CLOUDS.—Against much rain the clouds increase very fast, especially before thunder. When they are formed like fleeces, but dense in the middle, and bright towards the edges, with the sky bright, they are signs of a frost, with hail, snow, or rain. If they form high in air, in thin white trains, like locks of wool, they portend wind, and probably rain. When a general cloudiness covers the sky and small black fragments of clouds fly underneath, they are a sure

HEAVENLY BODIES.—If there be a haziness in the air which fades the sun's light, and makes the orb appear whitish, or ill-defined; or at night, if the moon and stars grow dim, and a ring encircles the former, rain will follow. If the sun's rays appear like Moses' horns, if white at setting; or shorn of its rays, or goes down into a bank of cloud in the horizon, bad weather is to be expected. If the moon

THE MILKY WAY.—That irregular stream of faint, cloudy light, which may be seen on clear, moonless nights by the naked eye, forming a circle entirely round the heavens, is supposed to be the remoter parts of the group of stars in which our sun is enveloped. To a spectator at a distant point in the heavens it may appear as a small

LIGHT HOUSES.

Fort Amherst Light at the entrance of St. John's.—A Light was first established at this station in 1813; in 1850 a new House, Lantern and Apparatus were erected. The Light burns at an elevation of 114 feet, is produced by a treble argand burner placed in the focus of an annular lens of the fourth order, and in favorable weather can be seen 16 nautical miles. When Cape Spear is enveloped in fog a heavy piece of ordnance is also discharged at this Fort every hour during daylight, to assist vessels in making the harbor. It is situated in lat. 47.33.54 N., and long. 52.40.18 W. John Sheppard, Keeper; Samuel Austin, Assistant.

Cape Spear Light.—This Light was first exhibited on the 1st September 1835 ; it is produced by seven argand burners and silvered reflectors burning at an elevation of 264 feet—it revolves, shewing a bright Light, every minute, and in favourable weather can be seen 26 nautical miles. It is situated in 47.31.11 N. lat., and 52.36.59 W. longitude. James Cantwell, Keeper ; Dennis Cantwell, Assistant.

Harbor Grace Island Light.—First exhibited on the 21st November, 1836 ; it is a fixed Light, has fifteen argand burners and reflectors, showing a steady bright light from N. to S. W. and by W. seaward, elevated above the level of the sea 151 feet, and can be seen in fair weather in rounding Cape St. Francis or crossing Conception Bay, on the intervening space between N. and S. W. and by W. 20 nautical miles ; on the land side the light is more feeble. It is situated in lat. 47.42.45. N., and long. 53.8.15. Austin Oke, Keeper ; Charles Snow, Assistant.

Cape Bonavista Light.—Situated in lat. 48.41.56 N., long. 53.5.20 W. ; is a Revolving Light, showing alternately every 90 seconds a white and red Light. It is produced by 16 argand burners and reflectors, burns at an elevation above the sea of 150 feet, and in favorable weather can be seen 18 nautical miles. By keeping this Light open with Cape Largent, it will carry you clear of the Flower Rocks ; first exhibited 11th September, 1843. Nicholas White, Keeper ; Mathew White, Assistant.

Cape Pine Light.—This tower is of iron, built by the Imperial Government in 1849-50, and first put in requisition on the 1st January, 1851. It is a fixed White Light, and shews a brisk flash every thirty seconds—has 12 argand burners and reflectors—elevated above the level of the sea 314 feet—situated in lat. 46.37.4 N., and in long. 53.31.45 W. In a favorable state of the atmosphere it can be seen 26 nautical miles. George Hewitt, Keeper ; Thomas Doran, Assistant.

Harbor Grace Beach Beacon and Light.—First exhibited 11th September 1850 ; stands on the Point of Beach at the entrance of Harbor Grace. It is a double Light, as a distinction from Harbor Grace Island Light, one being placed above the other, preserving that appearance for six miles, exceeding this distance up to ten miles the two lights appear blended into one. In sailing into Harbor Grace with a fair or leading wind, bring the Beach Beacon to bear W. or W. by S., and by keeping the Light or building a little on the starboard bow it will carry you clear of the Bar, on which at low water there is not more than 8 feet of water. It is situated in lat. 47.41.28 N., and in long. 53.12.33 W ; elevation above the sea level 40 feet ; in clear weather it may be seen at a distance of 11 nautical miles. George Brown, Keeper.

Green Island Light at the entrance of Catalina Harbor, Trinity Bay.—Situated in lat. 48.30.16 N., long. 53.2 40 W. This is a fixed white Light, burns at an elevation of 92 feet above high water, and in favorable weather will be seen from E.N.E., seaward, to S.W., 15

nautical miles. Vessels bound Northward by keeping this Light open with the North Head of Catalina until Bonavista Light opens with Cape LeJean, will give the Flowers Rocks an ample berth—or when coming from the Northward and bound for Catalina, by giving the N. Head a moderate berth, you will clear the Brandies Rocks by steering for Green Island Light. It was first exhibited in 1857. Henry Roper, Keeper ; William Houlahan, Assistant.

Cape Race Light.—Exhibits a Revolving white Light, from sunset to sunrise. The Light will be visible to seaward from N.E. by E. round by the S.E. and S. to W. The Light is elevated 180 feet above the mean water level of the sea, and may be seen in clear weather 19 nautical miles from a ship's deck. The tower is striped red and white vertically. It stands close to the old Beacon, which has been cut down. The Light house is in lat. 46.39.30 N., long. 53.4.30 W., and was first exhibited in 1856. Michael J. Hally, Keeper ; George Simms, Assistant.

Dodding Head, Great Burin Island Light.—This Light was put in requisition on the 3rd August, 1858, and is exhibited every night from sunset to sunrise. It is revolving, catoptrical of the second order, producing a brilliant White Light every minute, with intermediate flashes at intervals of twenty seconds, burning at an elevation of 430 feet above the level of the sea, and in favorable weather can be seen 29 miles—situated in 47.0.26 North Latitude, 55.8.43 West Longitude. Austin Sheppard, Acting Keeper ; John Churchill, Assistant.

Offer Wadham Island Light.—Was first exhibited on the 4th October, 1858, and is lighted every night from sunset to sunrise.—The Light is a steady, fixed lens-light, burning on a circular Brick Tower 100 feet above the level of the sea, and can be seen in a favorable state of the atmosphere 15 nautical miles. Situated in Latitude 49.36.0 North—Longitude 53.45.6 West. Charles Prowse, Keeper ; Peter Woods, Assistant.

Baccalieu Island Light.—This Light is exhibited every night from the going away of daylight in the evening to the return of daylight in the morning. The Light House is situated on the Northern end of the Island—Latitude 48.8.51 North, Longitude 52.47.50 West,—the tower is of brick, the keeper's dwelling a square building detached from the tower, painted white with the roof red.

The Light is a catoptrical first class Holophotal revolving white Light, shewing a flash every twenty seconds. It is elevated 443 feet above high water, and can be seen in clear weather 30 nautical miles, and a lesser distance according to the state of the atmosphere.—When the Southern end of the Island bears N.N.E., the Light will not be visible when nearer the Island than 8 miles. It was first exhibited in 1858. James Ryan, Keeper ; John Ryan, Assistant.

Cape St. Mary's Light.—Was put in requisition on the 20th September, 1860 ; it is a revolving catoptrical Light of the first order producing alternately every minute a brilliant red and a white Light burning at an elevation of 300 feet above the level of the sea, and

will be seen in a favorable state of the atmosphere 26 nautical miles from a vessel's deck; situated in 46.49.30 N. lat., 54.11.34 West long. The tower is of brick, and on each side of which stands the dwellings of the Keeper and Assistant, the sides of which are painted white, roofs red. John Rieley, Keeper; William J. Collins, Assistant.

St. John's.—Two red Lights are exhibited every night from sunset until sunrise, intended as leading marks for vessels entering the Narrows. The lower light on the roof of the Custom House—the other 400 yards in the rear, on a white post, within a few yards of the N.E. angle of the Congregational Church, and 180 feet above the level of the sea. These Lights will be readily distinguished from other lights in the town; and keeping them in a line bearing N.W. $\frac{3}{4}$ W., will lead in the largest vessel clear of all danger. To serve as leading marks also during the day, the pediment of the Custom House has been painted white; this is to be kept in line with the upper lantern, also painted white. Exhibited 1st September 1863.

Brunet Island Light, Mercer's Head, Fortune Bay.—First exhibited 27th June, 1865. It is a powerful, flashing white Light, and attains its greatest brilliancy every ten seconds. It burns at an elevation of 408 feet above the level of the sea, and in clear weather may be seen at a distance of 35 miles, and be visible in every direction from North round East and South, to W.N.W. Mercer's Head is a bold headland, and situated in long. 55.59.30. W., and lat. 47.16. N. Martin Sparrow, Keeper; James Gaulton, Assistant.

Galantry Head, Island of St. Peter's.—The Fixed Light on Galantry Head, (Island of St. Peter's), since the 10th August, 1862, has been replaced by a Flash Light, with intervals of twenty seconds, and by one red flash after two white flashes; situated in lat. 46.45.30 N., long. 58.27.0 W.; elevation above high water 64 metres. Distance at which the Light is visible 18 miles. The Light is hidden at the Northward by the high land of St. Peter's.

Light at the South Entrance St. Peter's.—Since 1st October, 1862, the entrance of the harbor of St. Peter's, called South Channel, has been marked by two small fixed Lights, one of which is a white Light illuminating three fourths of the horizon, and placed on the Battery—and the other a red Light, on the plain at the North of the town. The white Light has an elevation of 11 metres, and is visible 6 miles. The red Light is elevated 19 metres, visible 3 miles distance. The line connecting these two Lights indicates the Middle Channel.

The position of the red Light has also been so determined that as soon as it is seen on the left of Cape Eagle, vessels coming from Columbiar in beating into the N.E. entrance will have nothing to fear from the shoals of Cape Rouge.

Robert Oke, General Inspector of Light Houses.

Light Dues.—One Shilling per ton on all vessels entering any port or harbor of the Colony, except coasting, sealing, or fishing vessels; but not to be levied more than once in any one year.—Sealing and coasting vessels—Sixpence per ton on registered vessels of 40 tons and upwards; Fifteen Shillings per annum on all vessels less than 40 tons.

The 19th of Victoria, Cap. 5, Sec. 5, enacts—"that no greater sum than £25 sterling shall be in any year levied for Light Dues on any steamer or vessel entering any port of this Colony; and no Steamer plying between Europe and any port of North America, and entering any port of this Colony as a Port of Call, shall be liable to pay any Light Dues or other port charges except pilotage.

MONEY ORDER BRANCH.

James Healy, Superintendent.

Office hours from 9 a.m. to 4 p.m.

Money Orders are now interchanged with the United Kingdom, Nova Scotia, P. E. Island, Canada, and New Brunswick, at the following rates of Commission.

Scale for United Kingdom—Orders up to £2 stg., 1s. stg.; from £2, up to £5, 2s.; from £5 up to £7, 3s.; from £7 up to £10, 4s.

Scale for the Provinces—Orders up to £5, 1s.; from £5 to £10, 2s.; from £10 to £15, 3s.; and from £15 to £20, 4s. No single Order can be granted for more than £20. No half-pence to be introduced in the Orders.

SYSTEM.

1—Money Orders are made out in forms supplied for the use of the Money Order Offices.

2—Persons applying for Money Orders are recommended to use printed "Application Forms" printed for that purpose.

3—Place of payment of a Money Order may be changed in accordance with instructions provided therefor.

4—Alteration of payee's name may be effected, by issue of a new Order and payment of commission thereon.

5—Applicants for Money Orders are expected to observe due care in the examination of the same, relative to filling and stamping; defect in Orders, when presented for payment, may cause difficulty and delay, for which the paying office is not to be held accountable.

6—Postmasters should be particularly careful to obtain from the person who presents a Money Order, whether the rightful owner or not, full information as to the Christian name, surname and address, of the party who originally obtained it, unless such party be a firm, when the name of the firm will suffice. *The only exception to this rule is*—When an Order is presented through a Bank, in which case it will suffice that the Order, being properly signed, be also crossed with the Banker's name.

7—As, however, *after once paying a Money Order, by whomsoever presented, the Office will not be liable to any further claim*, the public are strictly cautioned,—

1st—To take all means to prevent the loss of the Money Order.

2nd—To be careful, on taking out an Order, to state correctly the Christian as well as the surname of the person in whose favor it is to be drawn.

3—To see that the name of the person taking out the Money Order is correctly known to the person in whose favor it is drawn.

8—Payment of a Money Order must be obtained before the end of the sixth calendar month after that in which it was issued, otherwise a new Order will be necessary, for which a second commission will

be charged; and if the Order be not paid before the twelfth calendar month after that in which it was issued, all claims to the money will be lost.

Neglect of the foregoing instructions will risk the loss of the money, besides leading to delay and trouble in obtaining payment.

The Money Order Offices in Newfoundland, at present, are : General Post Office, St. John's; Post Offices at Bay Bulls, Bonavista, Brigus, Burgeo, Burin, Carbonear, Ferryland, Fogo, Greenspond, Harbor Breton, Harbor Grace, Placentia, Trepasssey, Trinity Twillingate.

9—Postmasters should recommend the use of Money Orders for the transmission of money, in preference to such transmission otherwise.

FIRE DEPARTMENT.

Insurance against FIRE is granted on every Description of Property, on the most favorable conditions.

LIFE DEPARTMENT.

The Company grants Insurance on Lives in Newfoundland at the European rates of premium.

Medical Examiner—Charles Crowdy, Esq., M.D.

Besides the Ample Funds of the "Northern," Insurers have the additional security afforded by a large and influential body of Proprietors, whose liability is unlimited. In this particular, the security afforded by the "Northern" exceeds that of most other British Insurance Companies, the great majority of whom limit the liability of their Shareholders to the amount of the subscribed Capital.

Prospectuses and all information can be had at the Office of the Agency.

Life Department.

The Public are specially invited to the 'course of the Company's business under this head. The undoubted security of a large paid up Capital, and the accumulations of a highly successful business, give the best guarantee to Insurers that their investments are safe, while on the Participating Policies the share of profits is as large as any other Office allows, and larger than most Offices can with propriety divide.

Fire Department.

The condition of undoubted security is also afforded to parties effecting Fire Insurances. Promptitude and liberality govern the adjustment and settlement of claims, and Assurances are effected at the lowest admissible rates according to the nature of the risks.

The Great New England Remedy !
DR. J. W. POLAND'S
White Pine Compound

Is now offered to the afflicted throughout the country, after having been proved by the test of thirteen years in the New England States, where its merits have become as well known as the tree from which in part, it derives its virtues.

The White Pine Compound Cures

Sore Throat, Colds, Coughs, Diphtheria, Bronchitis, Spitting of Blood and Pulmonary Affections generally. It is a remarkable Remedy for Kidney Complaints, Diabetes, Difficulty of Voiding Urine, Bleeding from the Kidneys and Bladder, Gravel and other complaints.

FOR PILES AND SCURVEY IT WILL BE FOUND VERY VALUABLE.

Among all the popular medicines offered for sale, no one seems to have gained favor like this *Compound*. The medicine was first made as lately as the spring of 1855, and then merely for one individual, who was affected with an inflammation of the throat. A cure was effected by it. This induced others to apply for the same remedy, and every one using it received great benefit. The article, however, went without a name till November following, when it was called *White Pine Compound*. During that month it was advertised for the first time.

Some time in 1856, an individual who purchased a bottle for a hard cough was not only cured of the cough, but also of severe kidney complaint of ten years' endurance. This being truly a *discovery*, the fact was mentioned to a skilful physician, who replied in substance that the bark of white pine was one of the best diuretics known, provided its astringency could be counteracted. If the other articles entering into the *Compound* would effect this, a fortune was in the medicine! *The fortune* has not yet been reached ; but the hundreds of cases effected by the *Compound*, in the most aggravated cases of kidney diseases, including *Diabetes*, prove it to be a wonderful medicine for such ailments. A large number of physicians now employ, or recommend it for such use.

But while the *White Pine Compound* is so useful in kidney inflammation, it is likewise a wonderful curative in all throat and lung diseases. It so quickly and soothingly allays inflammation that hoarseness and soreness are removed as if by magic. Numerous cases have

been reported to the originator, where relief in very severe cases have been experienced in one hour, and a cure effected in twenty four hours.

There is a very natural reason for this. The barks and even the leaves, or "needles" of the white pine, contains eminent medicinal qualities. The Indians employed the bark of white pine in treating diseases long before the settlement of America by Europeans.

The past year has given a great opportunity to test the virtues of the *White Pine Compound*. It has been an unusual time for Colds and Coughs, and very large quantities of the *White Pine Compound* have been sold and used with the happiest effects. It speaks well for the medicine, that the people living where it is prepared are high in its praise.

One bottle of this *Compound* is generally sufficient to remove a bad cough; and frequently I have known persons to have a cold entirely removed in two days by using less than half a bottle. From one to two teaspoonfuls is a large dose. I sometimes put a little white sugar and hot water with it, when taken on going to bed.

The limits to which I purposely confine myself will not allow of that full expression which I would like to give in favor of the *White Pine Compound*. It is so universally admired by all who use it; it has attained to such a popularity among those whose opinion is valuable indeed, that *vanity* may possibly in part prompt me to record more here than hurried people will have patience to read; so I will stop by merely recommending to all who need a cough or kidney remedy, to test the virtues of the *White Pine Compound*.

FROM HON. P. H. SWEETSER.

South Reading, May, 1864.

DR. J. W. POLAND.

Dear Sir,—Having long known something of the valuable medicinal properties of the White Pine I was prepared, on seeing an advertisement of your *White Pine Compound*, to give the medicine a trial. It has been used by members of my family for several years, for colds and coughs, and, in some cases, of serious kidney difficulties with excellent results. Several of our friends have also received much benefit from the *Compound*. We intend to keep it always on hand.

The White Pine Compound.

GEORGE W. SWETT, M.D., Proprietor.

Will be manufactured in future at the NEW-ENGLAND BOTANIC DEPOT, 106 Hanover Street, Boston, under the supervision of Rev. J. W. POLAND. Dr. GEORGE W. SWETT will attend to the business department, to whom all orders should be addressed.
